

# **‘Improving Lives’ our 5 year ambition**

## **Our Plan: Improving Lives**

We are setting out a bold ambition to improve the lives of the people who use our services every year

Our services not only reach the population of Sheffield but the wider parts of South Yorkshire too

Our aim is to provide outstanding care, which is close to home

Making services easy to access, and there when you need us the most

We want our environments to feel inclusive and welcoming

## What we will do

Make sure that the care and support we provide, puts you at the heart of everything we do.

We believe that this will put us firmly on the map as an outstanding organisation.

We will respond to the changing needs of mental health, learning disabilities, neurodiversity and dementia services

Grow our diverse workforce

Value lived experience, seeing diversity as a super so that we can deliver the best care possible to the people we serve

Our services will be trauma informed with a focus on human rights, supporting carers and families towards recovery.

We want our services to be truly inclusive

Delivered in a way that honours the environment

We want to make the best use of every public pound

Through research and innovation lead the way as a modern health care provider we will be better placed to tackle health inequalities

## Our promise to you

We will make a bold stand against any form of abuse, harassment, violence or racism

Working hand in hand with the local community

Your voice has shaped our ambition which we will deliver using inclusive involvement

We want Sheffield Health Partnership University Trust to be known as an improving organisation and loyal partner

And our focus is to work together in an inclusive, respectful and kind way to improve lives.

Our strategy is about you

And the people we serve and the partners we work with

Acting as a north star to the dedicated workforce who are there for you every day
